Suggestions for Process Optimisation

International Networking

IT / Communication

- > Availability of individual solutions for all customers***
- > recent, multi-redundant communication and storage solutions included in the basic package***
- > Beyond that the possibilities of the integration exist, if necessary, draft more individually (also real-time), customized solutions.***
- > Service / Performance optimized Databases (also WebEDI)***

Most modern possibilities of communication are available

Due the use of innovative technologies on heterogen platforms (Linux / Novell, Windows) has reached a level of nearly 100 % high availability.
